Fireman Microphone
VA-6100FM

Description

VA-6100FM is used for remote control of VA-6100 system, allowing users to remotely control system voice information and zone paging, and supports background broadcast, fire alarm, microphone paging and other functions.

Feature

* Support key lock function;
* Support microphone paging;
* Support multi-source broadcasting;
* Support fire alarm function;
* Support local audio monitoring function;
* Support zone/group selection;
* Support line audio input and the input volume is adjustable.

Specification

Power supply	
Voltage	DC24V, 18-31V adaptive
Maximum current	0.2A
Maximum power consumption	5W
Standby power consumption	3W
Performance	
Line input	
Sensitivity	775mV
Input resistance	10kΩ
Microphone input	
Microphone type	PTT
MIC type	Dynamic
Sensitivity	10mV
Impedance	600Ω
Monitor audio output	
Rated output	0.7V
Output Power	30mW (Drive 16-32Ω earphone)
Frequency response	200Hz~16KHz
Distortion	＜0.3% (rated output power), 1KHz
SNR	>70dB
