

### Description

Adopts distributed feedback laser, single-mode dual-core working method, data transmission rate up to 2.5Gb/s, transmission distance up to 15km. Using duplex LC fiber interface to transmit multiple source data packets. Support for hot-swap, connect to use without any driver needed.

### Feature

- \* Distributed feedback lasers.
- \* Single-mode dual-core working method.
- \* Data transmission rate up to 2.5Gb/s
- \* Transmission distance up to 15km
- \* Using duplex LC fiber interface to transmit multiple source data packets.
- \* Support for hot-swap, connect to use without any driver needed.
- \* Design guarantees eye safety, which achieved laser level 1 standard.

Size (mm)	128.5×99.6×28.3
Operating Voltage	DC 5V/2A
