

Technical Parameters

Model	TL-JGB0-04
Laser Type	adopt all-solid-state semiconductor laser
Power Supply	110-220V/50HZ-60HZLK
Laser Power	G: 200MW: 300MW: B: 500 MW
Motor	Scan: 25 KPPS high speed closed loop laser graphic galvanometer
Control	DMX512 standard
Control Mode	voice control, DMX512, self-propelled, master-slave
Sound Activation	open address code 9
DMX512	Open address codes 1 and 10
Auto Push Mode	Open address code 0
Master And Slave Modes	(assigned to the first laser address code 1, assigned to other lasers at address code 2)
Function	It has the combined control effect of speed, size, four laser scanners and multiple beams.
Performance	The International Laser Performance Association has issued a variety of beams and pictures, including four sides, laser screens, space-time channels, and dance butterflies
