

Technical Parameters

Model	TL-FCF0-03
Power Supply	three-phase five-wire system AC380V \pm 10%, frequency 50Hz \pm 5%
Signal Interface	Digital Dual DMX-512 (1990)
Rated Power	12 channels \times 4KW. The maximum output power of each circuit can reach 4KW
Dimensions	L515 \times W485 \times H133, machine weight: 19KG

Features:

- The core component is made of imported materials, the performance is stable and reliable.
- Good heat sink and forced air cooling combined with intelligent environmental control system.
- Efficient anti-jamming choke has strong anti-interference ability, low noise and current rise time of 220us-450us.
- Start loop setting, preheat value setting.
- The dimming curve can be set to linear or switch state. The switch value is 50%. When the brightness value input in the switch state is higher than or equal to 50%, the corresponding output circuit is full output, otherwise there is no output.
