

Description

Applicable to ordinary classrooms, multimedia classrooms, offices, conference rooms, prisons, hospital departments, subways and other places to increase external control equipment and functions of IP network terminals.

Features

- * Professional integrated IoT type 86*86 size controller. The structure is very solid, beautiful and elegant.
- * Built-in high-performance 32-bit dual-core processor with the characteristics of fast processing, stability and so on.
- * Built-in industrial-grade terminal block and IP network terminal real-time communication interface.
- * Support external control device function: external audio input supports touch volume adjustment; network audio input supports touch volume adjustment;
- * The external control equipment is connected by blue and white connection cable (24AWG), and the connection distance is no more than 15 meters.

Specifications

Model	T-7771
Communication interface	Industrial standard terminal block
Connection communication distance	≤15 meters
Transmission rate	34Kbps
Overall power consumption	≤3W
Ambient temperature	5 ° C ~ 40 ° C
Ambient humidity	20% to 80% relative humidity, no condensation
Operating power	DC 24V (provided by the controlled terminal)
Size	90.5×90.5×27.5mm
Weight	0.5kg
