

# Amplifier Board

## PP1 (VA-6501)

### Feature:

- \* Supply power for cabinet amplifier board
- \* Support the indication of the working state
- \* Support uninterrupted maintenance and repair, and start-stop function on the module

### Specifications:

Model	VA-6501
Input voltage	~ 110~ 220V 50/60 Hz
Maximum input current	12A
Fuse specification	250V/12A slow type
Output voltage	± 85 V, + 24V
Maximum output current	11A, 3A
Heat dissipation mode	Forced air cooling
Protection mode	Over-voltage, over-current, high temperature protection
Dimension	L124*W60*H263
Weight	1.6 kg
