

Description

It has the characteristics of seamless display, long service lifespan, high frame rate, high refresh rate, good uniformity, wide viewing angle, high grayscale, natural color reproduction, etc. It is widely used in command and dispatch, security monitoring, video conference, television studio, various indoor conference rooms, etc.

Feature

- * Used to monitor and display the scene situation in real time and play various advertisements.
- * Seamless splicing, no visual black seams.
- * The display unit is flexible and compact to achieve smooth flat and curved splicing.
- * DC low-voltage power supply, natural heat dissipation, no fan, and zero noise.
- * It only needs to maintain a single LED pixel or a single module when it fails, which is convenient and cost-saving.
- * Support picture correction, use gamma correction technology to realize pixel-by-pixel brightness and color correction.
- * Support smart light control, adjust brightness intelligently, improve picture comfort, and save energy.
- * With ultra-wide viewing angle, the display is still clear when viewed from any angle.
- * With ultra-high refresh speed, the screen has good continuity and high fluency.
- * The display is delicate and realistic, and the grayscale is still excellent in low brightness.
- * Support UHD display; adopt unique image quality enhancement technology to effectively improve image clarity; the high-speed picture is smooth without tailing.
