

Linear Array Speaker

TK-S120

Description:

The passive linear array subwoofer consists of a 12" woofer. It adopts the compressed acoustic design to enable farther sound transmission. It is required to work with the full-range linear array speakers. And it is suitable for various small and medium performances, theaters, auditoriums, banquet halls, multi-function halls and other high-end venues.

Feature:

- * A 12" woofer with high efficiency and high sensitivity.
- * High-quality high-density birch wood housing, precision CNC processing.
- * Professional speaker sockets and plugs with good electrical characteristics.
- * Emery spraying process, high-end and wear-proof surface.

Specification:

Model	TK-S120
Type	Linear array subwoofer
Nominal impedance	4Ω
Frequency range	37Hz-200Hz
Rated power	400W
Peak power	1600W
Sensitivity	102dB/W/m
Maximum SPL(rated/peak)	128dB/131dB
Woofer	12"×1
Net weight	32.9kg
Size	360×731×500mm(H×W×D)
