Facial Recognition Server

TS-8612F1

Description:

The facial recognition server, used with facial recognition software, endows the paperless conference system with powerful AI facial recognition capabilities, and provides facial detection and positioning, facial attribute recognition, facial comparison and other independent private data service modules under the premise of authorization. The system supports facial recognition login, facial recognition sign-in, voting and scoring authentication and other functions for a paperless conference system.

Specification:

Model	TS-8612F1
CPU	i5 (six-core) (Due to continuous product upgrades, its performance will continue to be optimized)
Memory	DDR4 16GB
Hard disk	SSD 128GB
Network card	2*Gigabit LAN
Video output interface	1*HDMI, 1*VGA
Other interfaces	8*2.0USB, 4*3.0USB, 1*MIC in, 1*Line out
Cabinet	1U rack mount design
Power supply	AC100-240V 250W
Working environment	0℃-60℃, 5%～95% (no condensation)
Dimension	430*250*44mm
Weight	4.2kg
