

2-channel Signal Amplifier

TL-LT931

Feature:

- * 1 in and 2 out.
- * Effectively improve the fidelity of DMX signal transmission.
- * Effectively improve the anti-interference ability of DMX signal.
- * DMX signal adopts photoelectric isolation technology.
- * Prevent the mains high voltage from entering the dimming console.
- * Prevent the lightning high voltage from entering the dimming console.
- * Improve the safety, stability and reliability of the dimming system.
- * Wide voltage input, adapt to voltage input of different countries.
- * Equipped with a 3-pin XLR socket.

Specifications:

Input voltage	AC 110-240V 50/60Hz, 6W
Output	DMX512/1990 signal
Shell material	All aluminum alloy
Protection level	IP67
Fixture size (L×W×H)	240×140×65mm
Package size (L×W×H)	365×205×112mm
Gross weight	2.0kg
Net weight	1.5kg
