

Feature

- * Double protection of stroke limit and mechanical limit
- * Fully spliced installation structure, no welding required
- * Limiters can be installed on any vacant position of the auxiliary pole on the track, and can be adjusted at will to meet the ideal docking effect of the curtain.
- * Use advanced virtual prototyping technology for track design, analysis and calculation (providing complete three-dimensional design modeling and mechanical analysis), providing a copy of the manufacturer's product brochure and stamp it with the official seal of the bidder. No welding is required for the installation of equipment and accessories)

Specification

Installation type	Hanging installation
Track size	Xm ,
Single side size	Xm
Type	Spliced triangular truss structure,
Load bearing	The lifting distance is <5m, the concentrated load in the center is 150kg, and the uniform load of every 3 meters is 100kg/m
Safety protection	Opening and closing limit, safety plate
Track cross-section size	W216mm*H350mm ,
Track weight	8.7kg/m
Accessories include	All auxiliary accessories required for the equipment, no lifting installation accessories
