Charging box

TZ-MKQLT

Features

1. The charger can be plugged into all USB ports at the same time for batch charging of devices .
2. Use a USB cable to charge, connect one end to the charger and the other end to the conference unit , supports 18W fast charging .
3. The charger will automatically match the appropriate current size to charge the device according to the device's tolerance current size. At the same time, it has an overcurrent protection function to ensure the safety of the charged unit.
4. Intelligent automatic circuit protection, all USB ports have short circuit protection and self-recovery functions.

Specification

Input voltage	100-240V AC 50/60Hz
Charging port (USB)	10pcs / 200W
Charging voltage	5V/9V
Charging Current	2A (max)
color	black
Dimensions (length x width x height)	245×140 × 65(mm)
weight	1.68kg
