

Description

The alarm door light of the medical intercom system is installed at the entrance of the ward. The different colors and status changes of the light indicate business information, making it convenient for medical staff to quickly locate areas and rooms.

Feature

- *Supports independent display of red, blue and green colors, and can display 3 colors at the same time.
- *Supports steady light and flashing states to indicate different business statuses.
- *Supports common call identification, alarm identification, and nursing identification status .
- *Connect to the ward entrance device or bed extension through the IO bus for communication.

Specification
