

Description

A universal receiving card with a maximum single-card resolution of 512*512@60Hz. It uses 16 HUB75E interfaces for communication and supports up to 32 groups of RGB output.

Features

- *Support point-by-point correction;
- *Support Gamma correction;
- *Support brightness and chromaticity correction;
- *Support HDR data display;
- *Support OSD display function;
- *Support seam repairing operation;
- *Support temperature detection and readback function;
- *Support voltage detection and readback functions;
- *Support pre-stored screen display function;

Specification

Device size	144mm×91mm×20mm (length×width×height)
Operating voltage	DC 5V
Power consumption	3W
Weight	110.7g
