

## Description

The LED display demonstration flight case is specially designed for high-end LED screen boxes, integrating transportation protection, rapid exhibition, and equipment storage. It adopts a reinforced protective structure + customized lining to ensure that the screen is protected from impact, moisture, and dust during frequent handling, long-distance transportation, and stacked storage, greatly reducing the risk of equipment damage. It is an ideal mobile solution for exhibitions, commercial displays, product promotions, and rental activities.

## Specification

Outer box dimensions (width x height x thickness)	555*245*870mm
Material	Fireproof board + high-strength aluminum alloy frame
Portability	Mobile air box with 4 universal wheels including 2 diagonal brakes + retractable adjustable pull rod
Operating temperature	-20°C~+60°C
Storage temperature	-35°C~+85°C
Enclosure protection grade	IP5X
Weight	≤22Kg
