

Description

TS-9169A is an 8-inch desktop wireless full-color touch screen, which used together with a programmable central control host. Colorful and wide screen with 16: 9 high-resolution supports more user-friendly interface like programming images, graphics, text, 2D / 3D buttons etc. In obstacle-free circumstances, its wireless transmission distance amounts to 80 meters.

Features

- * It has graceful outlook and durable features. 8-inch TFT LCD display and 16: 9 high-resolution color (24-bit color depth) wide screen display show very clear pictures.
- * It can communicate with central control host through wireless receiver. In obstacle-free circumstances, its wireless transmission distance is up to 80 meters.
- * The operating interface can be customized by users to be the common image format like PNG, JPG, etc.
- * Support handheld.
- * Built-in rechargeable battery and one charge can be used continuously for eight hours.
- * Adopt resistance touch screen with high sensitivity, so the operation response is faster.

Specifications

Model	TS-9169A
CPU	AM3358
Memory	RAM: 256MB; ROM: 2GB
Display Screen	Display Screen
Screen Type	TFT LCD
Size	8.0"
Resolution	800×480
Aspect Ratio	16:9
Color Depth	24 bits 256K color
Transparency	8 bits alpha channel
Brightness	450 nit (cd/m2)
Contrast Ratio	500:1
Backlight	LED
Visual Angle	Level ±70°, Vertical ±70°, -50°
Control-Touch Panel	Control-Touch Panel
Touch Screen	Resistance-type touch screen
Switch Type	Power self-lock switch
Reset	Reset button
Indicator Light	Power indicator: blue; Signal indicator: green
Power Port	DC 12V/2A input
USB Port	Mini USB
Battery	Battery
Battery Capacity	7.4V/4300mAH
Battery Charging Time	3.5 Hours
Charging Temperature	0°C -55°C
Battery Specification	Li-ion battery 7.4V
Other Specifications	Other Specifications
Loudspeaker	8Ω; 1W
Wireless RF	433MHz obstacle-free transmission distance 80m
Static Power Consumption	1.6W (7.4V/216mA)
Max Power Consumption	3W (7.4V/405mA)
Dimensions (mm)	238 (L)×144 (W)×88 (H)
Weight	About 1.14Kg
