

Description

- * Can edit program to periodically control the device that is powered off and powered on by an external power source.
- * Program control of devices in the system that need to be turned on and off periodically.

Features

- * Standard cabinet design (2U), black alumina brushed panel, humanized hand-drawn, sophisticated craftsmanship, showing high-grade temperament.
- * With 10 editable timing control power supplies, the maximum power consumption is 2500W.
- * Large-screen LCD screen, graphical interface, easy to operate. It can display 10 power status indications, date, day of the week, time, information of the next program, and so on.
- * With 1 channel sound output interface and 1 channel alarm short circuit signal input interface.
- * With 1 channel trigger control short circuit signal output interface, which can trigger alarm and other equipment.
- * With short-circuit trigger output interface, it can control the 16-bit power sequencer switch and expand the timing power socket.
- * Support copying a program from one day of the week to another day or days.
- * The power-off program is not lost, and the call is automatically resumed.
- * Large storage capacity, multi-step programming timing control power supply.

Technical Parameters

Model	T-6205
Power supply	~220V 50Hz
Power consumption	45W
Dimension	484 x 328 x 88mm
Weight	5Kg
