

### Feature

All aluminum alloy structure, stainless steel bracket, waterproof protection, wide frequency domain, strong sound penetration, and wide sound coverage; suitable for squares, railway stations, etc.

### Specification

|                              |                                    |
|------------------------------|------------------------------------|
| <b>Model</b>                 | T-720G                             |
| <b>Rated power (100V)</b>    | 15W, 30W                           |
| <b>Rated power (70V)</b>     | 7.5W, 15W                          |
| <b>Maximum power</b>         | 60W                                |
| <b>Impedance</b>             | Black: COM Green: 670Ω White: 330Ω |
| <b>Frequency response</b>    | 300-13KHz                          |
| <b>Sensitivity</b>           | 102dB±3dB                          |
| <b>Waterproof protection</b> | IP66                               |
| <b>Size</b>                  | 245×245×300mm                      |
| <b>Weight</b>                | 2.4Kg                              |
